FLUID SENSORS

PRODUCT CATALOG

Company Profile

BitSENSE Electronics (Suzhou) Co., Ltd. was founded in Suzhou in 2021, specializing in the development, manufacturing, and sales of industrial sensing and control products. It is committed to the upgrading of China's industrial sector and the transformation towards intelligent manufacturing.

The company possesses multiple sensor invention patents with completely independent intellectual property rights. It draws on and sublimates foreign sensor design schemes, adhering to innovation and independent factory production. With a flexible design system, it aims to become a sensor solution provider tailored to the Chinese industrial market. With a comprehensive production and manufacturing system, quality management, and supply chain management, it provides high-standard products with a 3-year warranty for the market. Adhering to sustainable development and a people-oriented business philosophy, it has established a comprehensive employee incentive and welfare system.

PHILOSOPHY

Innovation and focus
Excellence in Quality

MISSION

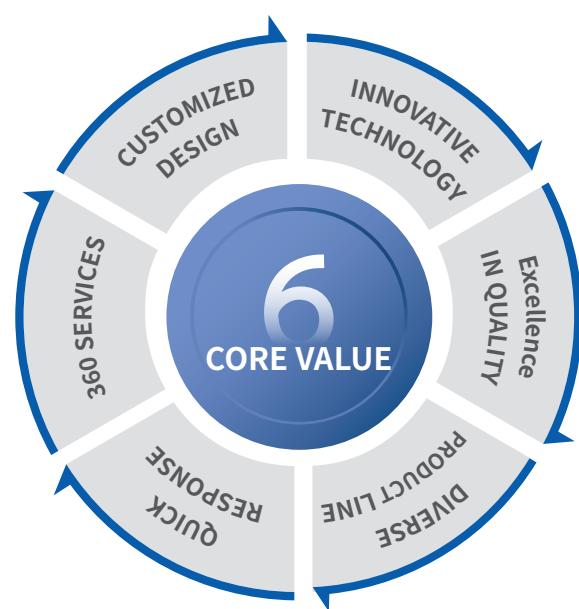

Provide for automation
Accurate and reliable perception

CORPORATE VISION

Achievement automation
National brand of sensors

- R&D, production, and sales of industrial sensors
- A research and development team with proprietary core technologies
- A comprehensive production and manufacturing system, quality management, and supply chain management
- Excellent product quality
- Rich product line
- Flexible customization design for customers
- Quick response time and short supply cycle.
- 360-degree service concept.

FLUID SENSORS

FLUID SENSORS

BitSENSE Electronics (Suzhou) Co., Ltd

Contents

I

PRESSURE SENSOR - BP SERIES

| | |
|--|----|
| Pressure sensor with display - BPD series | 01 |
| Compact pressure transmitter - BPS series | 07 |
| Compact pressure transmitter - BPT series | 09 |
| Food hygiene pressure transmitter - BPH series | 10 |
| liquid level transmitter - BPQ series | 12 |
| Micro Air Pressure Switch - BPC Series | 13 |

II

TEMPERATURE SENSOR - BT SERIES

| | |
|--|----|
| Temperature sensor with display - BTD series | 14 |
| Compact Temperature Transmitter - BTS Series | 16 |

III

FLOWMETER - BF SERIES

| | |
|----------------------------------|----|
| Turbine flowmeter - BFW series | 17 |
| Gear flowmeter - BFG series | 19 |
| Thermal flow sensor - BFT series | 21 |
| Vortex Flowmeter - BFV Series | 23 |

IV

LEVEL SENSOR - BL SERIES

| | |
|--|----|
| Capacitive Level Sensor - BLC Series | 25 |
| Capacitive level sensor with temperature integrated - BLT series | 27 |
| Impedance level switch - BLM series | 29 |
| Tuning fork level switch - BLF series | 31 |

Product Features

- Three-button one-hand control
- LED digital display
- M12 standard Plug

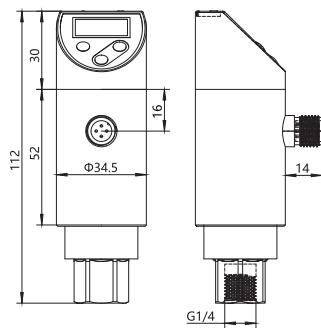

Product Category

- 2*PNP Output
- G1/4 Internal thread process connection

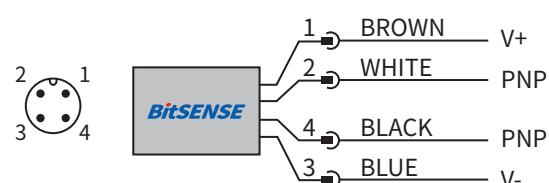

PRODUCT SPECIFICATIONS

Turbine flowmeter - BFW series

Product Introduction

- Rangeability 1:50
- Use a non-magnetic carrier detector
- Repeatability $\pm 0.1\%$ RS
- Strong anti-interference performance
- Low pressure loss
- Dynamic response time $\leq 5\text{ms}$
- Temperature resistance range: $-40\text{~}+150^\circ\text{C}$
- Optional explosion-proof

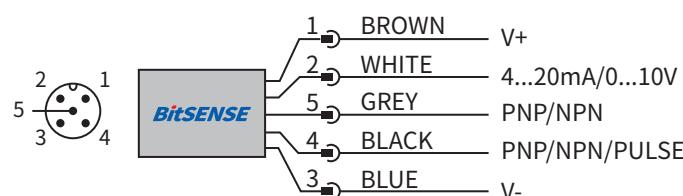

Technical Parameter

| | | | |

Thermal flow sensor - BFT series

Product Introduction

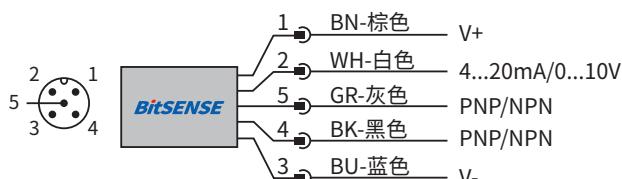

The BFT series flow and temperature integrated sensor adopts a thermal principle, features a full metal housing design, and a 4-segment LCD display. It is suitable for flow rate detection of various pipe diameters and different media. With no moving parts, it is maintenance-free.

- Applicable to various media such as water, oil, and gas
- Integrated flow and temperature monitoring
- Plug-in installation, suitable for various pipe diameters
- 4-segment LCD display
- Switching value + Number of analog outputs are optional
- PNP/NPN, NO/NC can be set
- The Housing can rotate 345° left and right

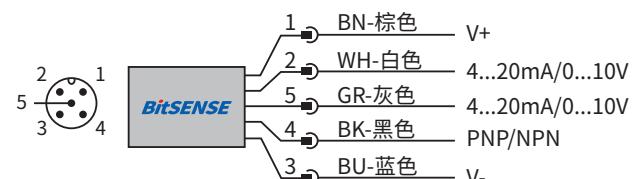

Technical Parameter

| | | | |
|-----------------------------|---|-----------------------------------|--|
| Flow Measuring range | liquid: 3...300cm/s gas: 200...3000cm/s | Maximum linearity range | liquid: 3...100cm/s gas: 200...800cm/s |
| Temperature Measuring range | -50~100°C | precision | traffic: 7% temperature: 0.5°C |
| Applicable Media | Water, ethylene glycol solution, oil, air | signal output | PNP/NPN, NO/NC can be set Number of analog outputs 4...20mA, 0...10V (optional) |
| power supply voltage | 24V±20%DC, 18~30V DC | Protection class | IP67 |
| Initialization time | about8s | Sensor housing | stainless steel 304 |
| response time | 2s | sensor probe | stainless steel 304 |
| pressure resistance | Max, 100bar | Resistance to ambient temperature | -20~+80°C |
| load | 400mA (PNP/NPN) | Medium temperature | -20~+80°C |
| line protection | Reverse protection, Short-circuit protection, Overload protection | No-load consumption current | ≤100mA |
| temperature gradient | ≤4°C C/S | electrical interface | M12*1 Connector |

Capacitive level gauge - BLC series

Product Introduction

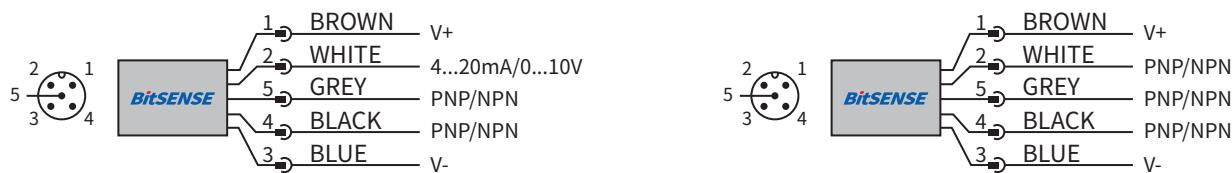

Capacitive intelligent liquid level gauge is a liquid level transmitter that can be applied to liquids, oils, and solid particles. With no moving parts, it is minimally affected by water vapor, dust, or condensation, greatly enhancing its reliability. It features long-term stability and reliability, high sensitivity, good linearity, high temperature resistance, high pressure resistance, and other characteristics. It can be widely used in industries such as petroleum, chemical, metallurgy, power, paper making, and pharmaceuticals.

- simple structure
- Multiple signal output modes
- It is suitable for liquid level measurement of high-temperature and high-pressure vessels, and the measured value is not affected by the shape and pressure of the vessel
- Made of 316L stainless steel and PTFE material, it is particularly suitable for measuring strong corrosive liquids such as acids and alkalis
- Comprehensive electrical protection against overcurrent, overvoltage, and power polarity reversal
- Optional explosion-proof

Technical Parameter

| | | | |
|-----------------------------------|---|------------------------|--------------------------------|
| probe length | 1~1500mm (customizable) | Protection class | IP67 |
| power supply voltage | 18...30V DC | Contact media material | PTFE、316L stainless steel |
| Switch Repeatability | ±0.25%FS (Typ.) | Sensor housing | 304 stainless steel |
| Number of analog outputs accuracy | ±0.5%FS (Typ.) | current consumption | ≤35mA |
| temperature drift | ±0.02%FS (Typ.) | response time | ≤50ms |
| pressure resistance | -0.1~4MPa | Resistant to vibration | 10g/0-500Hz |
| Resistance to ambient temperature | -40~80°C | impact resistance | 50g/1ms |
| Resistance to Medium temperature | -50~150°C | electrical connection | M12 A-code joint |
| line protection | Inversion includes, Overload protection, Short-circuit protection | Process interface | G1/2, G3/4, G1 external thread |
| signal output | 4...20mA/0...10V (optional) +2*PNP/NPN, 3*PNP/NPN | | |

Installation Precautions

- During installation, the connection method of the product should be checked before connecting it.
- This product is a precision transmitter, and it is strictly prohibited to disassemble, collide with, drop, or violently shake it.
- If the capacitance value is found to exceed the maximum range of 2800pF during use, it indicates a problem with the mechanical structure of the product, and there is a risk of leakage from the detection electrode. Please stop using it.
- Made of 316L stainless steel and PTFE material, it is particularly suitable for measuring strong corrosive liquids such as acids and alkalis.
- The Housing of this series of products must be reliably grounded, with a grounding resistance of <4Ω. For applications involving plastic tanks, please use a grounding pipe sleeve for installation.

Tuning fork liquid level switch - BLF series

Product Introduction

The BLF1E series tuning fork level switch is a liquid level sensor designed based on the principle of tuning fork vibration, which can be used for level detection of liquids, powders, solid particles, and other materials.

- 316L stainless steel fork body
- 304 stainless steel Housing
- Comprehensive electrical protection against overcurrent, overvoltage, and power polarity reversal
- PNP, NPN dual output (numerous display versions)
- 2-channel switch signal + 1-channel analog signal (digital display version)
- Optional intrinsically safe or explosion-proof type

Technical Parameter

| | | | |
|-----------------------------------|---|--------------------------|--|
| probe length | 45mm, 100mm, 200mm are optional | Protection class | IP67 |
| power supply voltage | 18...30V DC | Sensor housing | 304 stainless steel |
| Measurable media | Liquid, powder, or granular solid | Fork body material | 316L stainless steel |
| Viscosity of the tested liquid | <1000mm ² /s | Resistant to vibration | 10g/0~500Hz |
| Density of the measured media | Solid: ≥0.1g/cm ³ , Liquid: ≥0.7g/cm ³ | impact resistance | 50g/1ms |
| Tested solid particles | ≤10mm | electrical connection | M12 A-code connector |
| Resistance to ambient temperature | -20~80°C | Process interface | Clamp, G1/2, G3/4, G1, G3/2 external threads |
| Resistance to Medium temperature | -40~120°C | response time | ≤3ms |
| line protection | Inversion includes, Overload protection, Short-circuit protection | vibration frequency | 300±50Hz (no digital display), 1200±50Hz |
| signal output | PNP/NPN | Switching time | 0.2s, with a switch delay time that can be set |
| current consumption | ≤45mA | Analog quantity accuracy | ≤±0.5%FS |

Model Selection

Tuning fork liquid level switch:

B L F **2** **D** **3** **2** ... tuning fork length

- 2: 45mm
- 3: 100mm (G1 and above optional)
- D: custom length
- 2: Clamp sanitary type
- 3: G1/2 external thread
- 7: G3/4 external thread
- 9: G1 external thread
- 0: G1½ external thread
- E: 2-way digital signal
- D: 4...20mA + 2 digital signals
- 1: without digital display
- 2: with digital display

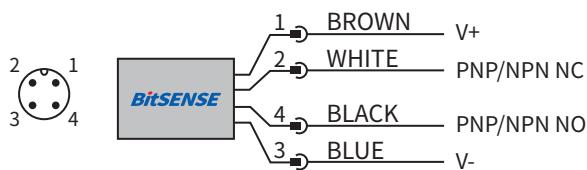

*The selection rules do not represent all combinations. Please confirm with the local sales for specific models.

Other customization requirements can be added after the order number:

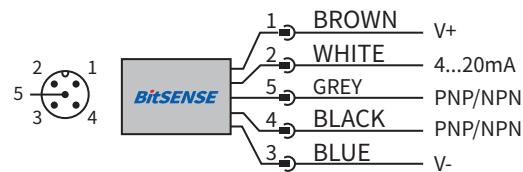

B L F **2** **D** **3** **2** -

- L: Customized extension of probe rod
- T: High-temperature heat sink
- E: explosion-proof
- F: Low-precision version (±1%FS)
- HM: Hirschmann connector
- C: direct qualification
- V: 0...10V output
